

# WILDFIRE RELIEF RESOURCES

## August 26, 2020

In America, the end of summertime has historically been a dichotomy of emotions, symbolizing the melancholic farewell to long, hot days, as well as the blossoming hope of a fruitful harvest. While this is still true, in California the end of summer has slowly become an anxiety-induced period of time with its representation of the dreaded fire season. 2020 unfortunately followed suit of the preceding years when an unheard of lightning storm ravaged California after a severe heatwave two weeks back, igniting over 100 wildfires. The two most severe fires broke out in Northern California, with the SCU Lightning Complex in South Bay and the LNU Lightning Complex in North Bay.

As we grapple with the ongoing fires, Chambers & Chambers wishes to support those affected most any way possible. Our hearts go out to the winery partners, loved ones, and residents who are currently being evacuated during these painful times. While it is important to keep those struggling in our thoughts and prayers, we want to also provide a list of relief charities below, for when those thoughts and prayers don't seem to be enough.
